

# Electronic Class

Topics covered include circuits and circuit testing, opens, shorts, voltage drops, relay testing, meter usage (DMM), labscope / graphing meter usage, sensor, actuators, and hands-on testing to use on an array of applications such as starting, batteries, fuel delivery, ignition, sensors, computers, and more. Through this hands-on training, you'll learn how to get the most out of your tools and equipment to find and repair electrical problems on today's vehicles instead of watching those expensive tools collect dust. **Bring your meter, scope, graphing meter amp clamp and any other electrical tools.**

**Class Limit of 10 technicians Due to COVID 19**  
**All Attendees MUST WEAR A MASK** (supplied by ATTS)

**Price \$795.00, Includes Electrical book, and Lunch Included**

Diagnosing Electrical Problems  
On Today's Motor Vehicles
